

Don't ask one AI. Ask the whole roundtable.

A rollout map for proving whether Generative Debate can become a product people understand, share, and return to.

Health first

Food

Tech

Sport

Finance

THE IDEA

One question becomes a multi-agent debate.

People do not just need one fast answer. For important questions, they need a multi-level response: different expert agents with specific perspectives looking at the same question.

One agent may focus on risk. Another on daily habits. Another on emotional context. Another on practical next steps. When those perspectives debate each other, the answer becomes more robust, more entertaining, and easier to trust than a single chatbot reply.

TOPIC SLATE

Health leads. The others compete for second.

Health is the strongest first topic.

TVBS / 健康2.0 is a real partner channel, and health questions naturally need multiple expert perspectives: family care, nutrition, sleep, rehab, and medical caution.

FOOD

Cuisine taste debates, restaurant choice, nutrition angles.

TECH

Tool comparisons, build decisions, operator debates.

SPORT

Tennis expert, coach, injury doctor, stats analyst.

FINANCE

Saving, spending, investing education. Not financial advice.

ROLLOUT TIMELINE

Earn the right to keep going.

START

Build the Health proof

Show a health question becoming a Roundtable of expert agents, then a useful recap.

Is the first experience working?

Users finish a first useful Roundtable. Sharing measurement is ready: share clicks, shared-link opens, and new sessions from shared links are recorded.

OPEN BETA

Learn in public, but do not call it fully launched

Health stays the main story. Food, tech, sport, and finance appear as secondary examples and tests.

SOCIAL LOOP

Watch whether people share it

A shared link should open the same topic and expert setup so the next person can start their own session.

Gate 2

Is this product pulling people back?

Only move bigger if people share it, receivers start sessions, users spend time in the debate, and people return without being pushed.

NEXT TOPIC

Pick the second topic from data

Food, tech, sport, and finance all get small tests. Choose the next topic by share rate, time in session, and repeat use — not opinion.

Gate 3

Can this become a paid partner test?

A partner such as TVBS tries Roundtable inside their app with real users for 30 or 60 days. Both sides agree what success means before it starts.

Gate 4

Is it ready to scale?

Only expand topics, partners, or markets when repeat use, sharing, and partner proof are real.

The product hits only if the loop completes.

01

See the hook

Understands Roundtable quickly

02

Start a session

Chooses a topic and expert setup

03

Reach a result

Expert debate plus recap

04

Share it

Sends same topic and setup

05

Receiver starts

New session from shared link

Hook clarity

Can someone explain it after a few seconds?

Time in session

How long users stay in the debate.

Share rate

Do users send links or recaps?

Shared link conversion

Does the receiver start?

Repeat use

Do users come back on their own?

First useful Roundtable

Did they complete one real session?

ASSETS AND DELIVERABLES

What needs to be made.

BEFORE OPEN BETA

30-second trailer / tutorial

One user question becomes a Roundtable of expert agents, then a useful recap. Deliverable: video file and landing-page embed.

BEFORE OPEN BETA

Six-second hook cut

Short social version: “Don’t ask one AI. Ask the whole roundtable.”

BEFORE OPEN BETA

Questions-and-answers page

What it is, who it is for, whether it is medical advice, and how sharing works.

BEFORE OPEN BETA

TVBS / Health 2.0 partner one-pager

How Roundtable appears inside their app and what the test is trying to prove.

BEFORE OPEN BETA

Terms + health disclaimer

Informational only. Not a doctor replacement. Not emergency care. Not financial advice for finance examples.

BEFORE GATE 1

Measurement checklist

First useful Roundtable, share click, shared-link open, new session from shared link, and time in session.

OPEN BETA

Health demo flow

A polished Health example with debate, recap, and share link.

OPEN BETA

Four secondary topic demos

Food, tech, sport, and finance examples using the same Roundtable format.

BEFORE GATE 2

Shareable link design

The receiver opens the same topic and expert setup. Deliverable: working link and preview card.

BEFORE GATE 2

Metrics dashboard

Share rate, shared-link conversion, time in session, repeat use, and first useful Roundtable.

BEFORE PARTNER TEST

Partner test brief

What TVBS-style partners are testing, what success means, and what happens after 30 or 60 days.

BEFORE PARTNER TEST

Partner rollout checklist

Owners for support, legal review, analytics, content review, and launch coordination.

Mixed signal means slow down.

1

First experience

Can people finish one useful Roundtable and understand what it is?

2

Social loop

Do they share, do receivers start, and do users come back?

3

Partner test

Can a partner run a paid test with real users and clear success rules?

4

Scale

Is the loop strong enough to expand topics, partners, or markets?
