BRAND POSITIONING

What we're selling, to whom, and against what.

ONE-SENTENCE POSITIONING

"A room where different minds meet the same question — each from their own stance. The fun is in the friction."

Source: Travis's exec brief

WHAT IT IS

You come in with a topic. You leave with a new angle. The core isn't Q&A — it's the collision of stances. The user puts a topic out; the system seats 2–3 personas suited to it. Within three minutes, they handle it from their own angles — stake a position, respond, disagree. The user can interrupt, follow up, or pivot at any time.

THE GAP IT FILLS

Not the news itself — the interpretation layer. "I know what happened, but I don't know what to make of it." The gap that reporting leaves behind, picked up by people at the table. Not information. Not answers. **A new angle.**

WHAT IT ISN'T

THE EXPERIENCE

Not an AI assistant — one voice, one answer. Not a podcast — pre-recorded, the same for every listener. Not AI companionship — flattery, not friction. Roundtable is not an assistant. Not a search engine. A room where different minds meet the same question.	Three minutes per round. Voice-first — tone is part of the stance. Non-replayable, but the card travels: topic, personas, key stances — designed to leave the product. The user leaves with an angle they didn't have before.
LEAD ICP — THE ONE WE SELL TO Health-content creators and knowledge workers who need interpretive depth, not just information. Open Beta leads with Health — body, mind, lifestyle — anchored by TVBS 健康 2.0. Team size 2–10. Producers, editors, medical reviewers who need multiple expert angles on the same topic.	CORE PAIN WE SOLVE One AI voice converges on one answer. Users with complex topics — health, finance, career decisions — need perspectives that collide, not consensus. The gap isn't information. It's interpretation. Single-voice AI closes down a question. Roundtable opens it up.

THE IDEA

One question becomes a multi-agent debate.

People do not just need one fast answer. For important questions, they need a multi-level response: different expert agents with specific perspectives looking at the same question.

One agent may focus on risk. Another on daily habits. Another on emotional context. Another on practical next steps. When those perspectives debate each other, the answer becomes more robust, more entertaining, and easier to trust than a single chatbot reply.

TOPIC SLATE

Health leads. The others compete for second.

Health is the strongest first topic. TVBS / 健康2.0 is a real partner channel, and health questions naturally need multiple expert perspectives: family care, nutrition, sleep, rehab, and medical caution.	FOOD Cuisine taste debates, restaurant choice, nutrition angles.	TECH Tool comparisons, build decisions, operator debates.
	SPORT Tennis expert, coach, injury doctor, stats analyst.	FINANCE Saving, spending, investing education. Not financial advice.

The launch plan now runs from validation to retention.

○ Pre-Launch 5/25 — 6/3

Demo Video + Landing Pages

- AUDIENCE** Closed cohort — tech-forward early adopters + TVBS 健康2.0 team.
- PRODUCT** Session latency <5s · Demo video completed · Landing pages live (Health + overall) · FAQ and terms ready.
- SOCIAL** Tim + Travis teaser posts — "something is coming" framing. No product reveal yet. Build anticipation without over-promising.
- PAID** Nothing. No budget before the product is ready to convert. Every dollar spent now is wasted.
- PR** Draft press email, Taiwan press note, TVBS timing note, and talking-points doc. Nothing sent to press yet.

THE LOOP

The product "hits" only if people move through the whole loop.

Understand, use, share, bring someone else in, and come back.

01

People see the hook

"Don't ask one AI. Ask the whole roundtable."

Target ≥ 10%

View → start

Percent of visitors who hit the page and begin setting up a session.

02

They start a Roundtable

Choose a topic. The system seats the right voices for it.

Target ≥ 60%

Start rate

Percent of those who begin setup and actually launch the session.

03

They reach a useful result

Three minutes per round. Distinct views, real disagreement, a recap card at the end.

Target ≥ 30%

First useful Roundtable

Percent who complete at least one full round and receive a recap card.

Target ≥ 6 min

Average session time

Under 3 min means the user left before the first round ended.

04

They share it

The recap card leaves the product — topic, personas, key stances. One link.

Target ≥ 15%

Share rate

Percent of activated users who take the recap card out of the product.

05

Someone opens and starts

Someone opens the card and starts their own session.

Target ≥ 25%

Shared-link conversion

Percent of people who open a shared card and launch their own session.

06

They come back

Returns without any push from us.

🔗 RETURNS TO 01 — THE LOOP CLOSSES HERE.

D7 ≥ 18% · D30 ≥ 12%

Repeat use

Percent who return on day 7 and day 30 with no outbound from the team in the prior 24h.

GTM ASSET — BRAND BRIEF

ROUNDTABLE AI'S
THREE PILLARS

STORY

AI is no longer a search box. It is a room you can enter. The whole worldview is built around one idea: conversations are more powerful when multiple minds collide.

SIGNAL

The roundtable is the symbol. Not a chatbot window. Not a feed. A table with empty chairs, expert voices, and a place for you to interrupt.

SYSTEM

Every topic becomes a living discussion. Health, fashion, food, finance, art — each one can be previewed like a show. The product sells the feeling of joining a conversation before it explains the technology.

WHAT THEY REALLY DID.

They built a room before they built a tool.

They built voices before they built answers.

They built participation before they built search.

└ *The AI was the last thing to arrive.*
